Daily Point Total	100					

A Scout is Clean. Please help us insure that Woodruff is here for future generations by helping to keep it safe, clean and in good repair.

Your campsite should be inspected daily by an adult leader from your troop or a volunteer inspector. This form should be used to grade your site.

Weekly Point Total:

Notes to Unit Leadership and to Campsite Inspectors:

- The purpose of the campsite inspection is to help teach Scouts the value of having a clean, neat and safe campsite. The inspection is intended to be a positive experience for Scouts and adult leaders rather than a punitive measure.
- Inspectors are encouraged to give the “benefit of the doubt” when they inspect a site. Scouts should have the opportunity to improve over the week if deficiencies are found early in the week.
- Each inspection item should be scored a zero or number within the range shown for that item (for example a 4 point maximum item may be scored 0, 1, 2, 3 or 4)
- Since many troops share a campsite, troops should work together to maintain health, safety and cleanliness of common areas such as latrines, pavilions, sinks and campfire rings.
- Inspection sheets should be displayed in a public area within the campsite so that all troop members are aware of inspection scores and deficiencies and can work to improve over the course of the week at camp.

Hammock Safety Rules

- Hang hammocks in secure locations, such as to trees or solid posts. Never attach a hammock to any object that could move such as vehicle bumpers or trailers.
- Securely fasten and check all knots prior to getting into a hammock
- Never “stack” hammock one above another.
- Hammocks should be hung such that the lowest point is not more than 3 feet above the ground. Severe injuries have resulted from elevated falls.
- Never swing or stand in a hammock. Falls from hammocks can cause serious or fatal injuries.
- Do not use a hammock that has frayed or damaged ropes.
- Do not put more weight into a hammock than recommended by the manufacturer.
